Re: Michelin Roller Tires

With the start of the 2019 season, Michelin becomes the official tire provider for the IMSA Michelin Pilot Challenge.

All Teams are required to convert to Michelin branded tires for roller tires used during movement of Cars around the Paddock at sanctioned Events.

Each Team participating at the ROAR before the 24 must convert to Michelin roller tires no later than the end of on-track activities on Friday, January 4.

For Teams not present at the ROAR before the 24, conversion to Michelin rollers is required by the end of on-track activities on the first day of their first IMSA sanctioned Event in 2019.

Teams may utilize existing used Michelin slick or wet tires as rollers or purchase a set of wet tires for roller use.

Subject to availability, Michelin may be able to provide Teams with used, take-offs for roller use at a cost of \$30 per tire, which includes mounting.

Once other brands of tires have been dismounted from Team wheels, those tires must be stored out of public sight during the remainder of the Event. Michelin will dispose of dismounted rollers should the Team wish to dispose of those tires.
