Re: Team Data Client – Al Kamel Timing Software

Please install the latest Team Data Client software by connecting to the pit lane network and pointing your web browser to <ftp://timing-data.aks/Software/>. Should you need assistance in downloading the software please see an Al Kamel representative at the Pit Cart in the pit lane, or contact a Pit Cart Tech Official at imsapitcart@imsa.com or 386-523-4995.

Each Entry is licensed for one (1) connection. Teams that would like to purchase additional 2018 Team Data Client connections from Al Kamel, can now do so online via Al Kamel Online Store at <http://imsa-store.alkamelsystems.com/account/>.

Teams will be required to sign up for an account prior to purchasing the connection(s). Please note, the website states that you will receive a username/password within two (2) days.

As a reminder, Team Data Client is software developed by Al Kamel that allows the team to receive timing data, weather and pit information in real time.

The main features are Team Data Client are:

- Session details, name duration and time remaining
- Configurable windows layout
- Classification by overall and by Class
- Sectors and top speed point passings
- Pit entry, pit exit, duration of the pit stop and fuel load
- Driver stint information
- Weather information
- Race direction messages
- Ability to connect anytime during a session and receive all data from that session
- Positioning screen

*Team Data Client works on Windows 7 and later.

If you have any questions, please email Al Kamel at v.pasalis@alkamelsystems.com.
